## **DETAILED ACTION / REASONS FOR ALLOWANCE**

### ***Remarks***

1. Receipt is acknowledged of a response on 3/25/2004, which has been placed in the file of record, and to which this action is a reply.

In the Office Action of 12/22/2003, the Examiner indicated that a timely filing of a terminal disclaimer could overcome a Double Patenting rejection based on 6,462,302, to the instant Inventor. The applicant has filed a terminal disclaimer, and as a result, the double-patenting rejection is hereby withdrawn.

### ***Reasons for Allowance***

2. Claims 1-22 and 24-32 are allowed.

The following is an examiner's statement of reasons for allowance: Two especially relevant prior art teachings are, as noted in the first action, Zemsky (US 4,175,346) and Atchison (US 5,758,446). Both of the above teach impressing a bullet with data upon firing which identifies the firearm from which the bullet was fired. Each falls short however in terms of teaching computerized scanning of the bar code. While one might suggest that this would have been obvious, it should be noted that Zemsky and Atchison both teach coding that wraps around the essentially the entire circumference of the bullet and therefore could not so easily be scanned

by conventional scanners. An intermediate step such as using carbon paper is suggested by Zemsky (column 5, lines 30-40), suggesting that simple scanning is not possible.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
